

ChromaZona

Software Update - Quick Guide

1 Start PC

➡ Log onto PC as an Administrator and shut all running software down

2 Insert software source

➡ Insert the software source, unzipping if the installation set is zipped. Run the file Setup.exe and follow the on-screen instructions

3 The PC may require a Windows update (particularly if the PC is Windows XP, Windows Vista or Windows 7). If you are presented with a message stating “[This application needs Microsoft .Net Framework 4.0 full version which is not yet installed. This can be found in the Support directory.](#)”, then follow step 3 if you have a full installation set or 4 if you just have an update set

Support folder

➡ Open the Support folder

➡ Open the Framework folder

➡ Run SetupFramework.exe. Follow the on-screen instructions, performing a system restart if update required

➡ Run Setup.exe once again and follow the on-screen instructions (see ChromaZona Full Installation Guide for details)

4

Download

dotNetFx40_Full_x86_x64.exe

Open a web browser, download and run the .NET Framework 4.0 full update from:

<http://www.microsoft.com/en-gb/download/details.aspx?id=17718>

5

Setup.exe

Run Setup.exe once again and follow the on-screen instructions (see ChromaZona Full Installation Guide for details)

ChromaZona is now ready to be used
